SEASPY CONTROL UNIT

Model D

Weighing only 11 Kg and housed in a durable yellow Polypropylene case, this unit provides the ultimate in portable controllers for our Seaspy underwater video cameras and lights.

- Very portable at only 11Kg
- Weatherproof when closed.
- 15 inch Colour LCD Display
- Sony Digital 8 Video Recorder
- Controls for Camera focus & Power
- 100 Watt variable intensity light supply
- Connection for microphone
- Built in audio speaker.
- External Video Typewriter socket
- Composite video and Firewire outputs
- Operation from 95 to 250 volts AC

A 15 inch colour active matrix TFT LCD display mounted in the case lid behind a scratch resistant Polycarbonate window displays a clear and bright image from any of Submertec's Seaspy cameras.

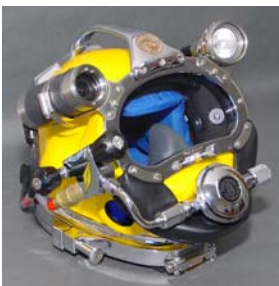

This display has a wide viewing angle, which allows the picture to be viewed by several people at once during recording and playback.

A Sony Digital 8 video recorder built into the panel has Composite Video and Firewire connections provided for post survey editing and copying without sacrificing quality.

Date and Time are automatically recorded on the tape and can be superimposed on the display either immediately or during playback.

When required, a Video Typewriter can be connected to a socket on the panel to superimpose text on the screen.

Variable intensity light control is provided for use with 24 volt lights of up to 100 Watts and provision has been made to preset the maximum voltage to suit different cable lengths.
